Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

45. (Currently Amended) A method for processing a plurality of frames of a film, each frame having an image section ~~and a magnetic section~~, said method comprising:

prescanning the image sections ~~and the magnetic sections~~ of the film at a coarse image resolution;

simultaneously displaying a thumbnail display of ~~said plurality of frames~~prescanned image sections on a monitor;

selecting at least one frame from said thumbnail display for scanning; ~~and~~

scanning said at least one selected frame at a finer image resolution; and

displaying a selected frame which is scanned at a finer image resolution.

46. (Original) A method for processing a plurality of frames of a film according to claim 45, wherein said prescanning and said scanning are conducted using a one-dimensional photoelectric converter.

47. (Canceled)

48. (Original) A method for processing a plurality of frames of a film according to claim 45, further comprising changing at least one photographic condition of at least one of said prescanned images before scanning.

49-51. (Canceled)

52. (New) A method for processing a plurality of frames of a film according to claim 45, wherein selecting at least one frame from said thumbnail display for scanning includes a user designating one frame on the monitor.

53. (New) A method for processing a plurality of frames of a film according to claim 45, wherein selecting at least one frame from said thumbnail display for scanning includes a user designating a plurality of frames on the monitor.
